

BASF D40 diffusor Diffuser

Advantages

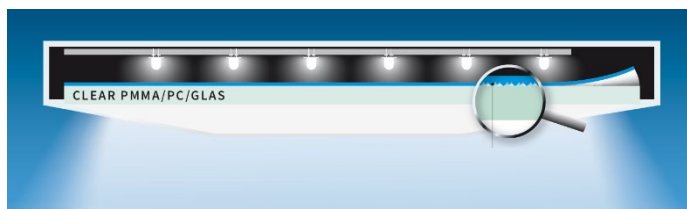

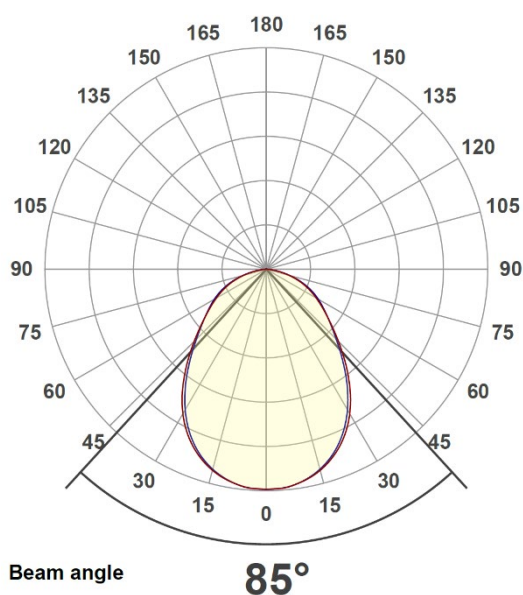

- Optical LED Diffuser film
- High transmission: >90%
- Seamless production
- Large available width: 1000mm
- High homogenization

The BASF D40 diffusor is an excellent choice for seamless continuous lighting fixtures. The high performance and highly efficient LED hiding-diffuser is state of the art. The BASF D40 diffusor is available in 1000mm width.

Thanks to BASF's expertise in micronano-technology they have designed an optical diffuser with a very high transmission. The ideal component for all LED sources.

Product data

Material	PET
Standard dimensions	1000mm width x continous roll
Thickness	125 µm
Hiding-Ratio	LED Pixel Pitch/Working distance to diffuser = 1,5
Transmittance D ₆₅	90%
Temperature range	-40°C to +120°C

BASF D40 diffusor with microstructures facing away from LEDs for homogenic light.

*Datasheet is made based on of producer's information. Ingemann Components A/S cannot guarantee the authenticity of the data.
