

Advantages

- Efficient linear glare reduction
- High transparency
- Smooth visual appearance

The **Ingemann Linear Prism** is an excellent choice for applications where $UGR < 19$ is required. The linear deglarng structure cuts of the light in the X axis, while maintaining the luminares distribution in the Y axis. The linear structure is either longitudinal or cross directional. This linear sheet is typically used in narrow light openings with high lumen packages.

Product data

Material	PMMA – Clear acrylic
Thickness	2mm± 0.15mm
Refractive index	1,491
Transmittance	94,3%
Standard dimensions	2200x1525mm
Temperature range	-40°C to +80°C
Glow wire test conducted	Yes
Build-up	One-plate solution

Measured light distribution curve, Ingemann Linear Prism ■ C0/C180 ■ C90/C270
