

BrightView 2D Batwing

Diffusive light controlling film

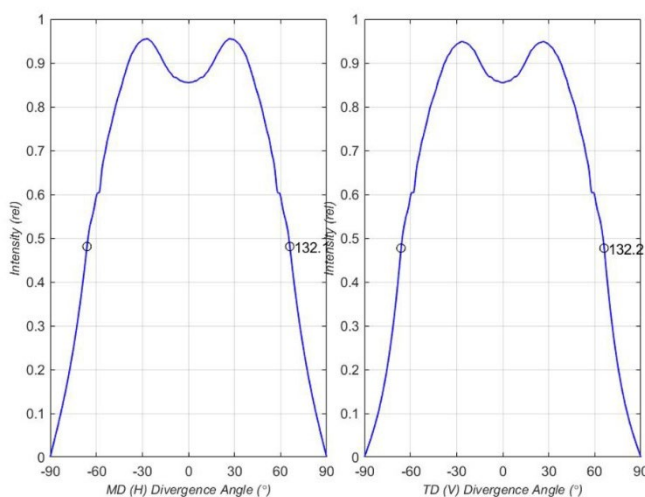

Advantages

- Excellent lamp hiding
- The 2-plane batwing is excellent to improve homogeneity of illuminated area
- No color shifts
- Great for both direct and indirect lighting

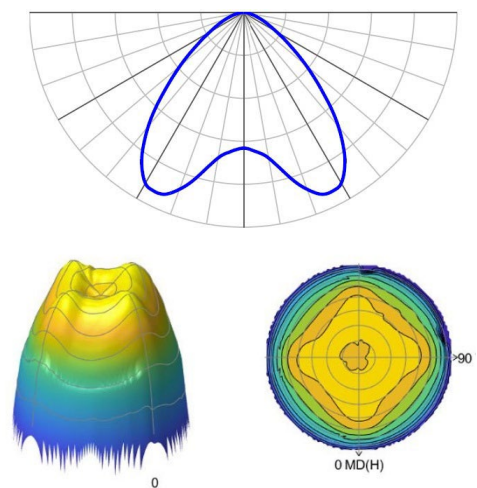

2D Batwing is a light-controlling film from the BrightView. It creates a batwing distribution in two axes perpendicular to each other. By incorporating a special nano-lens design on the film's surface, a 2D batwing distribution is achieved. These diffusers provide an efficient two-dimensional "batwing" distribution, helping luminaires achieve a flat-field beam profile that uniformly illuminates floors or work surfaces without a central hot spot.

Product data

Material	PET
Standard dimensions	1830 x 610 mm
Thickness	0,175 mm
Spreading Angle	65.1° ±5% / 68° ±5%
Efficiency	95%
Flamability UL-94	Vtm-2

Measured using a Lambertian source

*Datasheet is made on behalf of producer's information. Ingemann Components A/S cannot guarantee the authenticity of the data.
